Structuralism in the Science of Consciousness

[*structuralism*]

an approach to consciousness research where the central aim is to investigate the structures of conscious experiences

This special issue of *Philosophy and the Mind Sciences*, edited by **Sascha B. Fink** & **Andrew Y. Lee**, will publish a collection of papers investigating the structure of consciousness. Relevant topics include degrees and dimensions of consciousness, quality-spaces, parts and wholes, the unity of consciousness, the role of structure in individuating conscious experiences, the relationship between phenomenal structures and neural structures, and modeling conscious experiences.

submissions

submission period

April 15 – August 15, 2024

Email (blinded) submissions to structuralism@phimisci.org.

Not certain your work fits this issue? We encourage you to make a pre-submission inquiry (even ahead of writing a manuscript) to structuralism@phimisci.org.
